1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Bednarz et al (US 6,500,262).

Bednarz et al discloses (see Fig 1, column 1, lines 6-9 and column 4, line 3 - column 5, line 24) a material application system comprising at least one application device; one or more additional operational locations physically separated from each other and operational functions including spray gun positioning; a wireless identifier (control console16); a hand held wire less access device (1) selected from the group: PDA, notebook personal computer, tablet personal computer; a wireless network (encoder) with infrared signal or radio signal; a console (16) including a visual display device for an operator; identification logic recognizes an identifier (receiver 36 detecting signals) within a sensing distance and the associated method providing the material application operational functions and the use of wireless connectivity for an operator.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Perkins et al (US 6,379,465) discloses system and method for controlling spray gun operating parameters (see Fig 3); Schroeder et al discloses (see
